Fresh Air Damper (FAD) For CoIPro Shelters

MODELS:
- FAD-4: Suitable for 4” dia. Flexible Hose Connections
- FAD-6: Suitable for 6” dia. Flexible Hose Connections

- Damper closes with fan/blower running at a min. of 100 CFM or 2 iwg pressure differential.
- Damper is opened manually using lever after blower is turned off and inducts fresh air through the wire mesh window.
- FAD is designed to work with flexible hose attachments at both ends, tightened with metal hose tights.
- For dual connections between the fan filter and ECU; use Model R-4 reducer in one hose and FAD-4 device in the other hose.
- Operating condition: -40° to 120° F; RH 5% to 100%
- Storage condition: -60° to 160° F, uses MIL810F approved gaskets.
